

View south on North Clinton Avenue near Bear Street

Reconstruction and Extension of North Clinton Street

North Clinton Street would function as a new direct connection, and alternate north-south route, to Downtown. The reconstruction of North Clinton Street from Bear Street to existing Genant Drive would support the City's vision for the redevelopment of the Lakefront, Inner Harbor, and Franklin Square neighborhoods.

North Clinton Street would be reconfigured with uninterrupted sidewalks on each side, curbside parking where possible, shared lanes for bicycles and vehicles, street trees, and curb bump-outs to shorten pedestrian crossing distances. The street would be extended to Butternut Street.
