

- **Develop a Traffic Management Plan, which identifies traffic management strategies, such as:**
  - Implementing Intelligent Transportation Systems such as variable message signs
  - Implementing local street improvements early in the project
  - Retiming signals within the project limits
  - Designating construction truck haul routes
  - Providing planned and unplanned Traffic Incident Management
- **Require the contractors to develop and implement a dust control plan**
- **Implement a noise and vibration monitoring program during construction**
- **Require that contractors prepare a lead exposure control plan**
