

Sustainability: Ecological Benefits

- Portions of Mud Creek and its tributaries will be restored
- Three culverts will be replaced by open-bottom or embedded culverts; one culvert will be removed
- Some culverts will be 3 sided and therefore not have a bottom
- Replacement culvert widths will be 1.25 times bankfull (streambed) width to maintain healthy habitat and accommodate fish and wildlife passage

Outlet of culvert under NB & SB I-81 (future BL 81), north of NY 481

Upstream from culvert under NB I-81 loop ramp
