

- **Develop a Traffic Management Plan, which identifies traffic management strategies, such as:**
 - Implementing Intelligent Transportation Systems such as variable message boards
 - Implementing local street improvements early in the project
 - Re-timing signals within the project limits
 - Designating construction truck haul routes
 - Providing planned and unplanned Traffic Incident Management
- **Require the contractors to develop and implement a dust control plan and to protect sensitive sites from impacts of diesel exhaust fumes**

- **Implement an outdoor ambient air quality monitoring program**
- **Require that contractors prepare a lead exposure control plan**
