

- NYSDOT will maintain 3 lanes in each direction along existing I-81 during peak commuter periods, and three lanes in both directions during non-peak hours
- Traffic information available at [511ny.org](http://511ny.org)
- Temporary signing, including the use of variable message boards, will be used during construction to alert motorists to travel changes
- Temporary concrete barrier will be provided between travel lanes and the work zones to protect both the traveling public and the construction workers
- In addition to the NYS Police providing enforcement of work zone traffic laws, automated work zone speed enforcement will be utilized
